

Letter of recommendation

Robert Pakszys

Semway and Robert has been working together close now since December 2009. Robert has helped our company with overall web development. He has had a great part in helping the company increase significantly over the years.

Robert delivers and helps Semway with products within web programming, applications, web pages and other web related products.

From being a small agency with 4 people Semway is now 12 employees and delivering web development to a broad range of clients in Norway.

Robert as a person is very professional, hard working, easy to communicate with, always delivering on time and he is a team player. This is also some of the reasons Semway and Robert are still working together successfully.

His communication skills are very good so we have no problems communicating together regarding complicated web solutions. We communicate through e-mailing, Skype and on the phone.

I hope that our cooperation with Robert will last for many more years to come.
I can recommend Robert to any other company considering his expertise.
